NFS to hold tests of alarm system

By Erwin Record Staff Reports
news@erwinrecord.net

Nuclear Fuel Services Inc. will conduct tests of the Erwin plant's alarm system on various dates during July.

The public living near the plant may hear the alarms and are advised that the alarms are part of a comprehensive test of the company's emergency response systems and do not indicate an actual emergency.

The following dates have been established for the alarm tests:

Friday, July 18

Sunday, July 20

Tuesday, July 22

Thursday, July 24.

Times have not been released, so the public should expect tests at any point during these days.

NFS has notified local law-enforcement officials of the dates and times of the alarm tests that are performed on a regular basis to assure that they are functioning properly.
